Governor's Press Release

Additional COVID-19 cases in Iowa, additional deaths confirmed

DES MOINES - Today, the Iowa Department of Public Health (IDPH) has been notified of 96 additional positive cases for a total of 1,995 positive cases. There have been additional 407 negative tests for a total of 17,874 negative tests to date, which includes testing reported by the State Hygienic Lab and other labs.

According to IDPH, an additional 4 deaths were also reported, 171 hospitalized, and 908 Iowans have recovered.

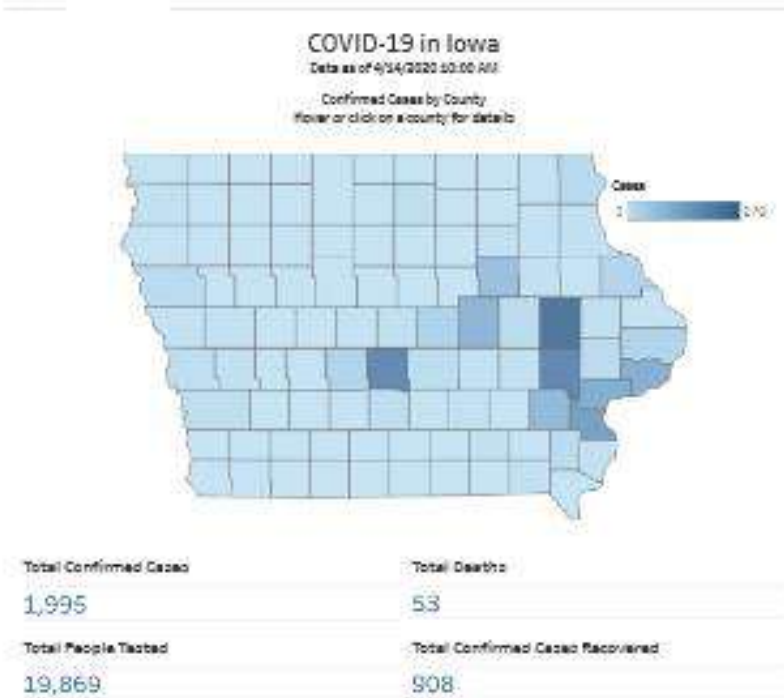

The additional 4 deaths were reported in the following counties:

- Allamakee County, 1 older adult (61-80 years)
- Clayton County, 1 elderly adult (81+)
- Johnson County, 1 older adult (61-80 years)
- Polk County, 1 elderly adult (81+)

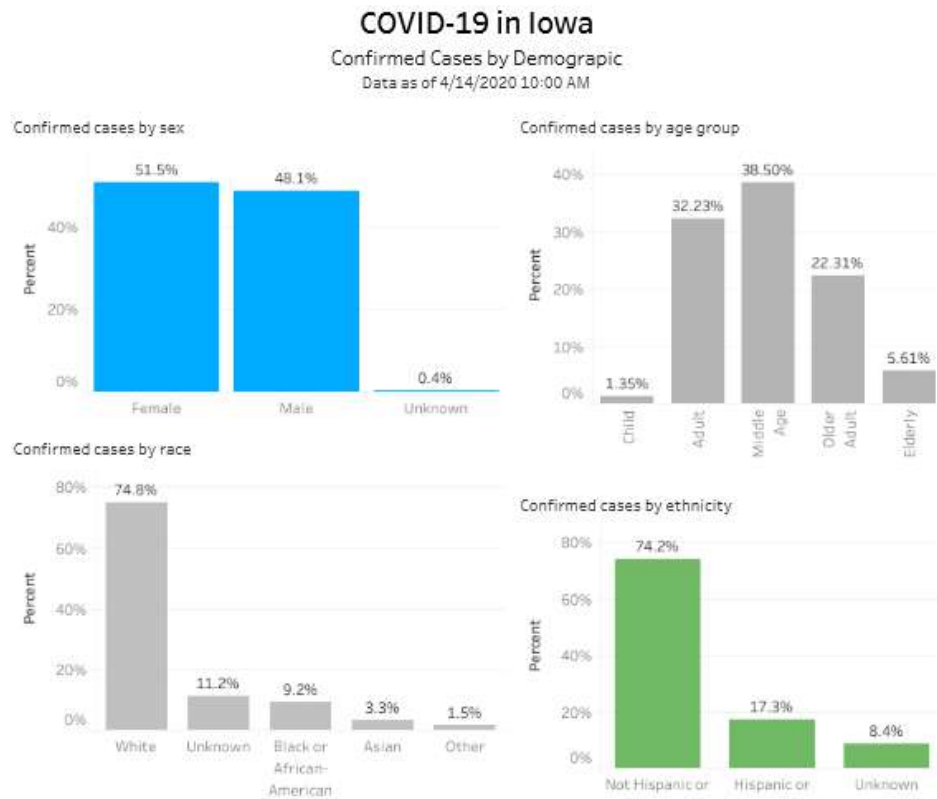

The state of Iowa has released an updated dashboard on coronavirus.iowa.gov that will be updated daily to include comprehensive tracking of COVID-19 in Iowa. The new dashboard includes cases, deaths, and tests conducted in each county. The state is now providing demographic information that was not previously provided as well as Iowa's epidemiological curve.

COVID-19 can affect people of any age, but adults in Iowa have been diagnosed with COVID-19 much more frequently than children. Children may still have (and spread) COVID-19, but not be so sick that they go to the doctor and get tested. Further, testing remains limited and physicians may not test children with mild disease, so they may be less likely to be reported as having COVID-19. Adults 60 and older have died more frequently than younger adults and children.

This chart shows the progression of the COVID-19 outbreak in cases and deaths over time, also known as an epidemiologic curve. Confirmed cases are people who tested positive. This is the curve that people are referring to when they say we want to "flatten the curve." Public health advises Iowans to stay home as much as possible in order to spread out the onset of disease over time, so that our healthcare system can continue to provide care to those who need it. While it's likely that there are more people in Iowa who have gotten sick with COVID-19 and not had a test, IDPH believes the shape of the curve is still informative; the number of people in our state who have had COVID-19 has been increasing through this time period. Because of the incubation period and how long a person is infectious, it will take some time to observe the impact of mitigation strategies. It should be noted that recent illnesses may not have been diagnosed or reported yet and data is updated as new information is received.

[Small Business Loans](#)

The U.S. Small Business Administration (SBA) has issued a disaster declaration for the state of Iowa as of January 31, 2020, and continuing. The declaration allows pandemic-impacted small businesses to apply for low-interest support loans. The declaration comes after Gov. Kim Reynolds submitted a federal funding request via the SBA's Economic Injury Disaster Loan program.

Applications can be made via the SBA's website: <https://disasterloan.sba.gov/ela/>. Applicants can monitor the status of their applications online after submission.

For questions, please contact the SBA disaster assistance customer service center at 1-800-659-2955 (TTY: 1-800-877-8339) or email disastercustomerservice@sba.gov.

Additional resources for businesses can be accessed at www.safeguardiowa.org.
