## COVID-19 JIC UPDATE 4/23/2020

Please note: The JIC update will be issued Monday through Friday.

### Governor's Press Conference

The Governor held a press conference at 11:00 a.m. today

### Governor's Press Release

#### **Additional COVID-19 cases in Iowa, additional deaths confirmed**

DES MOINES - Today, the Iowa Department of Public Health (IDPH) has been notified of 176 additional positive cases for a total of 3,924 positive cases. There have been an additional 842 negative tests for a total of 25,338 negative tests to date, which includes testing reported by the State Hygienic Lab and other labs.

According to IDPH, an additional 6 deaths were also reported, 282 are currently hospitalized, and 1,492 Iowans have recovered.

According to IDPH the additional 6 deaths were reported in the following counties:

- Bremer County, 1 elderly adult (81+)
- Muscatine County, 1 elderly adult (81+)
- Polk County, 1 middle-age adult (41-60 years), 3 elderly adults (81+)

The state of Iowa has released a dashboard on [coronavirus.iowa.gov](https://coronavirus.iowa.gov) that will be updated daily to include comprehensive tracking of COVID-19 in Iowa. The dashboard includes cases, deaths, and tests conducted in each county. The state is now providing demographic information that was not previously provided as well as Iowa's epidemiological curve.

COVID-19 can affect people of any age, but adults in Iowa have been diagnosed with COVID-19 much more frequently than children. Children may still have (and spread) COVID-19, but not be so sick that they go to the doctor and get tested. Further, testing remains limited and physicians may not test children with mild disease, so they may be less likely to be reported as having COVID-19. Adults 60 and older have died more frequently than younger adults and children.

This chart shows the progression of the COVID-19 outbreak in cases and deaths over time, also known as an epidemiologic curve. Confirmed cases are people who tested positive. This is the curve that people are referring to when they say we want to "flatten the curve." Public health advises Iowans to stay home as much as possible in order to spread out the onset of disease over time, so that our healthcare system can continue to provide care to those who need it. While it's likely that there are more people in Iowa who have gotten sick with COVID-19 and not had a test, IDPH believes the shape of the curve is still informative; the number of people in our state who have had COVID-19 has been increasing through this time period. Because of the incubation period and how long a person is infectious, it will take some time to observe the impact of mitigation strategies. It should be noted that recent illnesses may not have been diagnosed or reported yet and data is updated as new information is received.
