The Governor held a press conference at 11:00 a.m. today

Governor's Press Release

Gov. Reynolds signs new proclamation continuing the State Public Health Emergency Declaration

DES MOINES - Today, Gov. Reynolds signed a new proclamation continuing the State Public Health Emergency Declaration. The proclamation permits health care providers to begin the process of resuming some elective surgeries and procedures through a phased approach, permits farmers markets to begin limited operations with appropriate public health precautions, and provides other relief to Iowans affected by this disaster. Read the full proclamation online [here](#):

Additional COVID-19 cases in Iowa, additional deaths confirmed

DES MOINES - Today, the Iowa Department of Public Health (IDPH) has been notified of 521 additional positive cases for a total of 4,445 positive cases. There have been an additional 2,190 negative tests for a total of 27,528 negative tests to date, which includes testing reported by the State Hygienic Lab and other labs.

According to IDPH, an additional 11 deaths were also reported, 278 are currently hospitalized, and 1,604 Iowans have recovered.

According to IDPH the additional 11 deaths were reported in the following counties:

- Bremer County, 1 elderly adults (81+)
- Black Hawk County, 1 middle-age adult (41-60 years), 2 older adults (61-80 years)
- Linn County, 2 older adults (61-80 years), 2 elderly adults (81+)
- Polk County, 2 elderly adults (81+)
- Scott County, 1 older adult (61-80 years)

The state of Iowa has released a dashboard on coronavirus.iowa.gov that will be updated daily to include comprehensive tracking of COVID-19 in Iowa. The dashboard includes cases, deaths, and tests conducted in each county. The state is now providing demographic information that was not previously provided as well as Iowa's epidemiological curve.

JIC Update

This chart shows the progression of the COVID-19 outbreak in cases and deaths over time, also known as an epidemiologic curve. Confirmed cases are people who tested positive. This is the curve that people are referring to when they say we want to “flatten the curve.” Public health advises Iowans to stay home as much as possible in order to spread out the onset of disease over time, so that our healthcare system can continue to provide care to those who need it. While it’s likely that there are more people in Iowa who have gotten sick with COVID-19 and not had a test, IDPH believes the shape of the curve is still informative; the number of people in our state who have had COVID-19 has been increasing through this time period. Because of the incubation period and how long a person is infectious, it will take some time to observe the impact of mitigation strategies. It should be noted that recent illnesses may not have been diagnosed or reported yet and data is updated as new information is received.
