Continue to Protect Yourself & Others

The Winneshiek County Board of Health and Winneshiek County Public Health would like to remind our community that you need to continue to help yourself and others by taking steps to maximize protection against the Covid virus.

If you are eligible to get vaccinated, we recommend you get fully vaccinated.

Parents, if you have children 12 years of age and older, get them fully vaccinated.

Use of masks in indoor places per CDC recommendations.

Additional CDC recommendations can be found at the following website.

<https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/prevention.html>

- Continue to practice social distancing 6 feet away from others.
- Avoid crowds and poorly ventilated spaces. If indoors, bring in fresh air by opening windows and doors, if possible.
- Wash your hands often or use hand sanitizer.
- Cover coughs and sneezes.
- Clean and disinfect if someone is sick or has tested positive.
- Monitor your health daily.

Vaccines continue to be offered at the medical clinics, Public Health, and the local pharmacies.

Call Winneshiek County Public Health at 563-382-4662 if questions. Follow Winneshiek County Public Health FACEBOOK page and www.winneshiekhealth.org for additional information.
