Decorah Sustainability Commission Endorses Downtown Recycle Bins

Decorah, IA (August 19, 2022) – The Decorah Sustainability Commission (DSC) recently approved a project to install recycle bins in the downtown Decorah area. This effort ties in directly to one of the DSC’s action items looking to reduce landfill waste. With the financial assistance of the Downtown Decorah Betterment Association (DDBA) and the Self-Supporting Municipal Improvement District (SSMID), four recycle bins will be placed along Water Street. People will be able to use these bins to recycle plastics (#1 & #2) as well as metal cans when in the downtown area. The containers are being constructed by Iowa Rotocast Plastics with signage created by Letterwerks Sign City.
